To whom it may concern:

We retained LINE Architects to develop a concept design for our new office at Romanov Dvor II office complex. Their approach to our request was refreshing and innovative in what is a difficult market. Through the main principal Mr. Arseni Goryaev and his partners, Mr. Simon Merrony and Mr. Sergey Nepomniaschi, we received architectural drawings and design templates promptly and accurately for what was a difficult brief.

LINE Architects' interesting design and the implementation of it enabled us to complete our project on time and within budget. I would recommend their services to other companies.
